Summary

I'm a web developer who has experience in full stack development. My strength is in building API's and I love addressing complex problems.

Experience

American Access Causality Company
Downers Grove, IL
Junior Web Developer Dec 2016 to Current
- Integrated third party APIs such as SendGrid and Twilio to address business needs.
- Built in-house

Dev Bootcamp
Web Developer Graduate Feb 2016 to Jul 2016
- 19-week intensive training program for aspiring web developers, rooted in learning full stack development skills and fostering empathetic work environments.

Northshore Truck & Equipment
Assistant Manager Sep 2014 to May 2016
- Developed a social media strategy targeting Facebook and Google+; lead to an 86% increase in Google search views.
- Started a new inventory system to decrease over ordering and maximize inventory via Quickbooks.

Menards
Assistant Building Materials Manager Jun 2013 to Sep 2014
- Oversaw an increase in sales of seven percent over the year before.
- Assisted in a complete remodel of store that spanned over three months.

Milwaukee Brewers: Helfaer Field
Operations Assistant May 2013 to Oct 2013
- Ran operations while working with participants requests to ensure the highest level of satisfaction.

Carroll University
Orientation Mentor Sep 2011 to May 2013
- Spent two fall semesters mentoring 50 first year students on how to adjust to life on a college campus.
- Spoke individually to each student multiple times through out the semester, while also accompanying a class they all shared.

Pi Lambda Phi Fraternity
Carroll University
Founding Father, Vice President, Recruitment Director Aug 2011 to May 2013
- Founded completely new chapter of Pi Lambda Phi at Carroll University.
- Recruited 15 new members as Vice President and Recruitment Director leading to membership growth of 66%

Junior Achievement
Volunteer Teacher Oct 2009 to May 2013
- Program used to teach elementary students on how local businesses work. Taught four different classes of 30 students each, over 6 week sessions.

Education

Carroll University
B.S. Business Management 2013

Dev Bootcamp

Projects

Study Buddy
Study Buddy is a "client project" that a team of myself and four others completed in 3 days. The purpose of this project was to allow an administrator to invite teachers to join via email. The teachers then could add and remove students from their prospective lists on their own, in order to keep track of who is in their groups. This project was built with Ruby on Rails, HTML, and CSS.

Progress
Progress was our three man group final project at Dev Bootcamp over 7 days. The inspiration for Progress was to provide Dev Bootcamp students a tool to create goals, track those goals, and view past successes. This app was built mobile first, but can be enjoyed on any device. Progress was built using Ruby on Rails, Haml, jQuery, Javascript, ActiveRecord, and the gem Materialize.

Skills

Ruby
Javascript
Sinatra
Rails
HTML5/CSS3
Git
SQL
ActiveRecord
Object-Oriented Design
HAML
jQuery
AJAX
Github
Postgres
Travis CI
ColdFusion
